# **Songun Politics Is the Independent Politics that Applies the Requirement of the Juche Idea**

Ri Song Chol

The key that the Songun politics guides the trend of our era with great attraction is that it thoroughly applies the requirement of the Juche idea.

Respected Kim Jong Un said.

“As an idea enriched and developed in the course of the practical struggle to apply the Juche idea, the Songun idea is a scientific revolutionary theory which makes it possible to satisfy the requirements of the Juche idea in an ideal and comprehensive manner.”

First, the Songun politics is the independent politics that comprehensively applies the requirement of the Juche idea to defend and realize the independence of the country and nation.

The independence is the nucleus of the Juche idea. From the scientific viewpoint of the law of historical development, the Juche idea defines independence as life and soul of a country and people and sets it as the basic requirement to defend and realize it. The Songun politics is the original politics of our style reflecting this requirement of the Juche idea.

The Songun politics is rooted in the Juche idea that elucidates the basic way of shaping the destiny of a country and nation and realizing the independence.

To defend independence is vital issue related to the destiny of a country and nation. This is, however, not easy. Only when we have our own strength, can we realize the idea of independence. However ardently we desire after

independence and try to realize it, we cannot do this if we have no strength to defend it.

Military affair is the main of the state affairs. The independence of the country and nation can be realized only by the politics that gives priority to the military affair. It is the bloody lesson of history that not only the independence, sovereignty and prosperity of a country and the way to defend the revolutionary gains made at the cost of blood rest on the force of arms.

The historical lesson of our revolution eloquently tells that the Songun politics that applies the requirement of the great Juche idea is the strong treasured sword to defend the nation and its independence by maintaining the basic idea and principle of the revolution.

Secondly, the Songun politics is the independent politics that applies the requirement of the Juche idea to strengthen the single-hearted unity of the revolutionary rank by all means.

The important requirement and contents of the Juche idea on the socio-historical outlook are that the people must be led by the outstanding leader and unite firmly on the basis of one ideology and centre in order to be the independent driving force of history.

Our Party's Songun politics applies this requirement of the Juche view of history. The Songun politics is the mode of politics that wins victory in the revolution and construction with the single-hearted unity, regarding it as the mainstay of the revolution.

The driving force of the revolution in the Songun era is the united whole of the leader, the Party, the army and the people. Characteristic of the single-hearted unity in this era is that the people firmly unite with the army, the most leading and decisive force of the revolutionary rank as the pillar, centring on the leader.

By dint of the Songun politics that applies the Juche idea, the might of the single-hearted unity is fully demonstrated in the building of a socialist power.

The vitality of the single-hearted unity is demonstrated in the fact that the revolutionary spirit created by the People's Army prevails in all the ranks and that the entire people, following the army, bring about national prosperity through the struggle to attain huge goal of building a socialist power. This unity enabled us to turn the unfavorable into the favorable and create something from nothing in such adverse conditions that the others might not survive. The proud reality and miraculous events of our country made by the Songun politics are the fruition of the invincible single-hearted unity based on the unity of the army and the people in ideology and fighting spirit.

The historical process of our revolution tells the revolutionary principle and historical truth that the driving force is precisely Songun, which is precisely the unity.

Next, the Songun politics is the independent politics that applies the requirement of the Juche idea to do the revolution and construction our own way.

The Juche idea is the independent ideology that requires doing the revolution and construction our way. Maintenance of the independent stand and the application of the creative method--this is the fundamental stand and method to be adhered to in the revolution and construction elucidated by the Juche idea.

The true path to the independent development is in solving all problems in our own interests according to our specific condition by relying on our own strength. Dependency on the foreign forces leads to shame and national

ruin.

At present, the arbitrariness and tyranny of the imperialists reach extreme. This being the situation, it is by no means easy to do the revolution and construction in our interests according to our specific conditions. The fundamental principle to maintain the independent stand and apply the creative method can be guaranteed only by strong power.

The Songun politics that applies the requirements of the Juche idea is the mode of independent politics that enables us to make the revolution and construction our own way according to our actual conditions.

The Songun politics gives strong gut and courage with which we do not tolerate any political and military pressure and interference of the imperialists.

By dint of the Songun politics, we solve all problems independently as we wish in the interests of our revolution without seeking foreign approval in such a complicated and acute situation as today.

This tells that the Songun politics is the independent politics that thoroughly applies the requirement of the Juche idea.

# **Adhering to Juche Character and National Character Is Vital to National Prosperity**

Kim Hok Chol

Adhering to the Juche character and national character in implementing the people's cause of independence is vital at present in bringing about independent development of a country and nation.

Leader Kim Jong Il said.

“Past experience and lessons have proved that adherence to the Juche character and national character is the key to success in the revolution and construction and vital to national prosperity.”

Adhering to Juche character and national character in the revolution and construction means to shape the destiny of a nation in an independent and creative way in accomplishing the people's cause of independence, the cause of socialism and to preserve and develop the excellent national characteristics and apply them in all fields of social life.

Adhering to the Juche character and national character is vital to national prosperity because the independence is the life and soul of a country and nation.

The independence is an attribute of a social being who is desirous of living and developing independently as master of the world and his destiny.

Every country regards independence as life and soul. If a country fails to defend national independence, it suffers from bitter destiny of being a ruined nation under the pressure of foreign forces, to say nothing of its prosperity.

Independence is the life and soul of a country but it is not realized of its

own accord.

Independence of a country is firmly defended only when the Juche character and national character are adhered to in the revolution and construction.

If Juche character and national character are adhered to, it is possible to firmly maintain the principle of independence and make the revolution and construction in one's own way relying on one's strength in the interests of one's revolution and construction.

The country and nation that adheres to the Juche character and national character can reject foreign interference and pressure and solve all problems arising in the revolution and construction according to its independent decision and judgment in conformity with its special conditions and the interests of its people.

We can not rise up again if we yield to the foreign pressure and retreat from what we chose abandoning our faith and agitating before difficulties. This is proved by the destructive destiny of those countries that blindly followed the instruction of the imperialists and dominationists, playing to their tune without the Juche character and national character.

Adhering to the Juche character and national character is vital to national prosperity also because this is powerful impetus to achieve national prosperity by strengthening the internal force by all means.

The internal force is the decisive factor deciding the rise and fall of a country. When the internal force is strong, we can ensure the independent development of the country and achieve national prosperity by our own efforts.

The main in preparing the internal force is to build up one's own political force, the driving force of the revolution.

The power of the driving force of the revolution is in the single-hearted unity. Apart from this unity, the power of the driving force of the revolution and national prosperity are inconceivable.

In the process of adhering to the Juche character and national character, all members of a nation can be united and rise up to the struggle for the national prosperity irrespective of differences in idea and ideal, political view and religious belief, class and stratum.

National prosperity is guaranteed by invincible military strength. It is today's stark reality that we can not defend the national independence and the right to existence, eventually becoming playthings and victims of the imperialists, if our military strength is weak.

Justice, peace and prosperity rest on force of arms. The strong force of arms enables us to defend the country and nation and encourage the building of a prosperous country including economic and cultural construction.

The powerful military strength can be invincible, when the Juche character and national character are adhered to. In the process of adhering to the Juche character and national character, we strengthen self-defensive military strength of the country by all means.

If the true independent development of a country is to be made, it is necessary to develop one's own economy, and this is possible when the Juche character and national character are adhered to. The country that adheres to the Juche character and national character can keep its independent stand and build the independent national economy its own way according to the requirement of the revolution and its own situation.

The revolutionary parties and people should adhere to the Juche character and national character in the revolution and construction to further strengthen the internal force and thus achieve the independent development

and prosperity of their country and nation.

Adhering to the Juche character and national character is vital to national prosperity because of the intensifying vicious moves by the imperialists and dominationists.

Arbitrariness, tyranny, interference in internal affairs and aggression of the imperialists become more overt at present. This infringes upon the dignity of many countries and threatens their independent development.

Under the gangster-like doctrine of “integrity” of the world, the imperialists try to subjugate all nations to them by making the whole world Western-style “free world,” intensifying military interference, ideological and cultural infiltration, sanction and blockade toward the other countries.

In order to achieve national prosperity against the dominationist moves of the imperialists, we must adhere to the Juche character and national character in the revolution and construction. Only then, can we keep the national soul to the last.

National soul is basic of the national character and the nucleus of national survival. Only the nations that keep national soul can successfully carry forward their independent spirit and cultural traditions, maintaining their nature.

That is why the struggle to adhere to the Juche character and national character is the struggle to frustrate the dominationist moves of the imperialists and keep and add brilliance to the national soul. With the Juche character and national character, we can frustrate the arbitrariness and tyranny of the imperialists, preserve historic heritages and cultural traditions of the nation and ceaselessly create new excellence of the nation, by the efforts of the nation.

Like this, national prosperity depends on whether we adhere to the Juche character and national character in the revolution and construction.

This unity is the powerful weapon that enables the army and the people to accelerate the building of a socialist power with the revolutionary and combatant fighting traits and work methods of the People's Army.

It is the idea and will of our Party to consummate with the great unity of the army and the people the cause of Songun revolution started and advanced victoriously by dint of this unity.
